

NCAA Archetype Dashboard Quick Guide

Printable reference for using the map, filters, player profiles, and watchlist.

Data Snapshot

Division	Players	Teams
D-I	2,971	365
D-II	2,627	289
D-III	3,550	397

Usage

This model helps identify players who fit target playstyles, then move the most interesting names into deeper scouting.

What The Map Shows

The map is a PCA view of player style. It compresses passing/creation, shooting quality, shooting volume, ball security, defensive rebounding, and size into two visual axes.

- PC1: size vs. creator guard traits; players farther right tend to be bigger and less guard-creation driven.
- PC2: shooting and spacing strength; players higher on the map tend to have stronger shooting profiles.
- Dot color: the player's archetype they are most like.
- Players under 6'7" can still show an F/C Stretch score, but they cannot be colored or classified as F/C Stretch on the map.
- Color key: blue = PG / Combo Guard, green = 2-4 Interchangeable Wing, orange = 5 / Stretch 4 / Big Wing.

Profile Stats And Filters

Player Profiles

- Bio: division, team, class, height, games, minutes.
- Season statline: points, rebounds, assists, steals, blocks, FG%, 3P%.
- League-average bars: player value vs. division average.
- Archetype scores: fit scores for PG, Wing, and F/C Stretch.
- Passed qualification parameters: which filter checkpoints the player passed.
- Similar players: closest style matches using the selected similarity metric.

Filter Controls

Most Similar Archetype only shows the player's highest eligible archetype score. Filter Mode applies stricter qualification logic. Minimum archetype score filters by score; when a role-specific Filter Mode is active, it uses that role's qualified-pool score.

- None: show the full player pool.
- General Player: baseline pass-shoot-dribble screen.
- PG / Combo Guard: General Player baseline plus guard requirements.
- 2-4 Interchangeable Wing: General Player baseline plus wing requirements.
- 5 / Stretch 4 / Big Wing: General Player baseline plus F/C size and spacing requirements.
- Other filters narrow by conference, team, position, class, minutes, production, shooting, rebounding, assists, defensive stats, and height.

General + Three Archetypes

General Player

AST% pctl 70+

eFG% 50%+

3P% 30%+

AST/TO pctl 50+

DREB requirement

PG / Combo Guard

AST% pctl 70+

AST/TO pctl 70+

3P% 33+ and rate 30+

2P exception pctl 70+

Emphasis: creation/security

2-4 Interchangeable Wing

DREB pctl 70+

3P% 33+

3P rate 30+

AST/TO pctl 50+

Emphasis: DREB + shooting

5 / Stretch 4 / Big Wing

Must be 6'7"+

DREB pctl 70+

3P% 30+

3P rate 25+

Emphasis: DREB first

General Player Exception

- AST% percentile 85+
- DREB percentile 85+
- AST/TO percentile 50+

Example: Tom Beattie, UC San Diego

Tom Beattie is a good example of how a player moves through the qualification system.

Baseline Profile

- Position: G
- Height: 6'4"
- eFG%: 53.6%
- 3P%: 32.3%
- 3P rate: 45.2%
- DRB%: 14.6
- AST/TO: 2.32

Step 1: General Player

Tom passes the General Player baseline through the standard path:

- AST% percentile: 84.4 passes 70+
- eFG%: 53.6% passes 50%+
- 3P%: 32.3% passes 30%+
- AST/TO percentile: 91.9 passes 50+
- Guard DREB requirement: 14.6 passes 10+

Step 2: PG / Combo Guard

Tom qualifies as PG / Combo Guard through the 2P efficiency exception path:

- General Player baseline passes
- AST% percentile: 84.4 passes 70+
- AST/TO percentile: 91.9 passes 70+
- 3P rate: 45.2% passes 30+
- 2P% percentile: 78.2 passes the 70+ exception

He does not pass the standard PG shooting path because his 3P% is 32.3%, just below the 33% threshold.

Example Continued + Recommended Process

Why Beattie Does Not Pass 2-4 Wing

- General Player baseline passes
- DREB percentile: 67.2, below 70
- 3P%: 32.3%, below 33%
- 3P rate: 45.2%, passes 30+
- AST/TO percentile: 91.9, passes 50+

Why Beattie Does Not Pass 5 / Stretch 4 / Big Wing

- General Player baseline passes
- Position: G, not F/C
- Height: 6'4", below 6'7"
- DREB percentile: 67.2, below 70
- 3P%: 32.3%, passes 30+
- 3P rate: 45.2%, passes 25+
- AST/TO percentile: 91.9, passes 50+

So Tom can still show a useful 5 / Stretch 4 / Big Wing score in his profile, but he is classified as PG / Combo Guard, not F/C Stretch.

Recommended Process

1. Choose an archetype from Filter Mode. Start with General Player for a broad screen, or choose a stricter role pool.
2. Add specific filters. Narrow by year/class, team, conference, position, height, minutes, production, shooting, rebounding, assists, or defensive stats.
3. Watchlist and compare. Open profiles, save names, and use the radar chart or similar-player list before film review.

Watchlist Usage

- Star a player from their profile.
